

FabriCoil™

Durable, Reliable, Resettable

With many of the desired features of typical high-speed doors, FabriCoil offers excellent durability and reliability at an affordable price. Our tough vinyl curtain is designed for interior applications, ideal for high traffic areas.

Exceptional Construction

Painted, structural steel angle guides provide superior protection from side impact. Optional hood is roll-formed from hot-dipped galvanized steel for a finished look.

Increased Rigidity

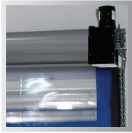

Resilient aluminum wind beams decrease fabric deflection in windy and negative pressure conditions. Additional wind beams can be specified for higher negative pressure environments.

E-Z Reset

FabriCoil can be easily reset back into the guides, which means less downtime for employees and no costly service calls for replacement or repair.

Features

Speed

FabriCoil motor operated doors open and close at an average speed of 17" per second.

Wireless Reversing Edge

If contact is made with the yellow reversing edge, FabriCoil will automatically return to the up position. The connection of the edge to the operator is wireless and no call backs to broken coil cords or cable reels.

ControlHoist™ Optima

All motor operated doors require a continuous-duty 1HP gearhead operator.

Options

Powder Coating

Many of the metal components on your FabriCoil door can be powder coated in any of the 187 ArmorBrite™ colors to match any design scheme. Powder coating is available on the hood, door guides, head plates and bottom bar.

Vision Panel

The FabriCoil traffic doors vision panel provides visibility, ideal in high traffic environments.

Curtain Hood

FabriCoil's optional hood is roll-formed from hot-dipped galvanized steel for a finished look.
